

Behaviour Assessment

	Severity		
Likelihood	Low	Medium	High
Low	Low	Low	Medium
Medium	Low	Medium	Medium
High	Medium	Medium	High

Establishment:		Assessor (print)		Signature:	
Address:		Responsible Person		Date:	
	Service Users / Students Name			Risk & Ranking	Persons at risk
1	Identified Behaviour <i>Grabbing clothing</i>			<i>May rip clothing but inadvertently scratch the victim Causing an open wound and possibility of infection</i>	<i>All Service users, visitors and staff at the Centre</i>
2	Trigger (if known) <i>Loud noises Shouting or loud music etc</i>				

3	Environment		
	<i>Day Centre with large group of clients with a high level dependency & mobility issues</i>		
4	Primary Preventative Strategy		
	<p><i>Service user to work in small groups and sessions to be attended have a low noise level.</i></p> <p><i>All staff working with client to informed of triggers and behaviour</i></p> <p><i>Service user to be given alternative activity when centre activity may be noisy.</i></p> <p><i>All staff supporting this client to be trained in conflict management and P.I. skills</i></p> <p><i>Record & monitor all incidents and review patterns of behaviour</i></p>	<i>Ranking with preventative strategies</i>	
5	Secondary Strategy		
	<p><i>If Service user enters a noisy area try to escort them away</i></p> <p><i>Offer reassurance</i></p> <p><i>Try to keep other service users at a safe distance</i></p> <p><i>Keep your self at a safe distance is possible</i></p> <p><i>Only one member of staff to engage with the client at this point</i></p> <p><i>Use a calm voice in a low tone</i></p> <p><i>Do not Shout</i></p>		

6	Reactive Strategy		
	<p><i>Ask service user to let go , allow time for response</i></p> <p><i>Use safety stance use a calm low voice and be patient, the service user may let go.</i></p> <p><i>If the service user seems to be becoming more stressed and agitated then use a supported (supporting wrist joint) up down technique to remove the service users grip.</i></p>		<i>Injury to service user or staff</i>
7	Further recommendations / comments		
	<p><i>Check service users history for information as to cause</i></p> <p><i>Service user to be sent for assessment to see if there are physiological factors involved that could then be addressed to reduce further incidents.</i></p>
